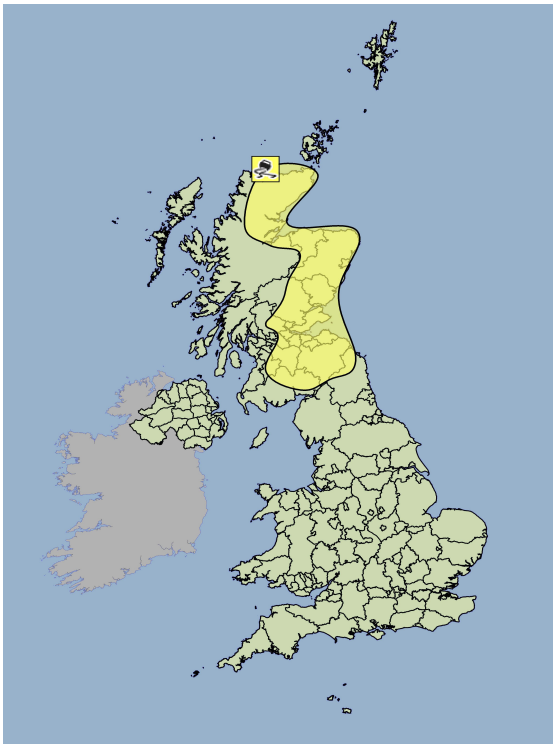
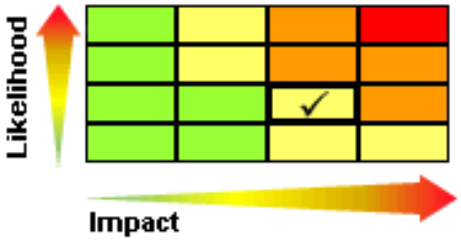
National Severe Weather Warning Service





Chief Forecasters Assessment
Snowfall is expected to continue overnight though gradually reduce in intensity, so for many areas the main hazard is likely to become ice where wet or slushy surfaces re-freeze.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Wed, 20th Mar 2013** until **10:00 on Wed, 20th Mar 2013**

Roads and pavements that have seen snowfall during Tuesday will turn icy overnight into Wednesday morning as wet or slushy snow surfaces tend to freeze in many areas. There will also continue to be scattered snow showers overnight, especially in eastern areas. Over upland areas, drifting snow cover will persist. The public should be aware that these combined conditions will be hazardous.
